PremiSys™ Mobile
for Access Control

Security at Your Fingertips

IDenticard's revolutionary **mobile app** integrates with PremiSys access control system to give system administrators the freedom to manage security activities from any **remote location** with a 3G network or Wi-Fi connection.

Instantly lock-down your building from anywhere.

System administrators may use a mobile device to:

- Lock, unlock, or lock out any individual door or group of doors
- Add, view, or edit cardholder information
- Take cardholder photos
- Instantly deactivate a cardholder record so that it no longer has access to the building(s)
- Run reports on system and cardholder events
- Acknowledge and clear system alarms
- Assign and modify what doors a cardholder may access
- Assign users who may use the mobile app

The **PremiSys Mobile App** is compatible with Apple® iPhone®*, iPad®, and Android™ Smartphone and is available through the Apple® App Store and Android™ Market. A mobile license must be activated through the PremiSys access control system.

* Available for iOS 4 and greater.

PremiSys™ Mobile
for Badging

Turns PremiSys™ into a Mobile Badging Enrollment Station

IDenticard's revolutionary **mobile app** integrates with PremiSys access control system to allow system administrators to manage the badging operations from **remote locations.** Take employee photos and print ID cards without employees leaving their workplace; saving time and productivity for your organization.
